

Industrial LNG Leader

PROMETHEUSenergy

What is Liquefied Natural Gas?

LNG is simply natural gas in liquid form. It is an odorless, non-toxic and non-corrosive liquid produced by cooling natural gas to approximately -260°F at atmospheric pressure. At this temperature the gas condenses into a liquid, increasing the energy density of the fuel by a factor of 600.

The increased energy density, in turn, allows LNG to be stored and transported at much lower cost than the gaseous form. LNG provides a safe, efficient and cost-effective means for fuel users without access to pipelines to enjoy the benefits of clean, low-cost natural gas.

Prometheus Energy is a pioneer in the development of the industrial LNG market. Converting industrial users to a more affordable and cleaner fuel resulting in lower fuel costs and lower emissions.

Providing a profitable, sustainable fuel solution

Integrated Fuel Solutions - Prometheus Energy is one of the largest and fastest growing suppliers of liquefied natural gas (LNG) to the industrial sector in North America. Prometheus provides turnkey fuel solutions to convert industrial users of diesel, propane and other crude-derived fuels to clean, domestic, secure LNG, resulting in reduced fuel cost and environmental footprint. The company is vertically integrated from LNG production through distribution, onsite storage, and vaporization. A pioneer in the industrial LNG market, Prometheus developed first-of-their-kind conversions of industrial fuel consumers to LNG in numerous sectors, and received an Award of Excellence at the 2011 Platt's Energy Awards in recognition of its industry leadership.

Building Natural Gas Downstream -

Prometheus Energy is a leader in the emerging downstream market for LNG as an industrial fuel. Historically, large energy consumers without access to pipeline gas have had little choice but to utilize diesel, propane, heating oil and other fuels derived from crude oil. As a result, these companies have suffered from high fuel prices and have not been able to enjoy the substantial economic and environmental

benefits of natural gas. Prometheus Energy is leading the development of the emerging natural gas industrial market, with delivered volumes up more than 400% over last year. Prometheus provides customized turnkey solutions: storage and vaporization, full requirements fuel supply, and complete operations and maintenance services. The result for industrial companies? Reduced operating costs, lower fuel costs, enhanced environmental profile, and increased competitiveness. The result for the gas industry? A new, large, and attractive downstream market.

Strategic Thinking, A New Mindset -

The company's innovative approach has led to numerous first-of-their-kind conversions of industrial fuel consumers to LNG, in sectors as diverse as drilling, food manufacturing, ore processing and commercial laundry. Prometheus' clear commercial thinking enabled the establishment of flexible solutions tailored to its customers' needs. Prometheus Energy's commercial innovation is matched by its technical innovation. This technical innovation was achieved under an experienced leadership team by a skilled and committed staff.
