The European Parliament's Committee on Industry Research & Energy (ITRE) visits LNG Silesia's coal mine methane liquefaction plant in Suszec, Poland

Suszec, Poland – June 27, 2011 – The visit to LNG Silesia was part of the official program of the ITRE Committee trip to Poland to learn more about Polish energy security and innovation, as Poland will take the EC presidency from 1 July 2011.

At the liquefaction plant, Dr. Edgar Kuipers, Board Member of LNG Silesia, and Dr. Miroslaw Skrzypkowski, Manager of Engineering for Prometheus Energy, introduced the ITRE Committee to the basics of LNG production from coal mine methane and its significant environmental benefits. The ITRE committee is especially interested in the prospects for future coal mine methane liquefaction plants.

LNG SILESIA

In 2005, LNG Silesia was established as a Poland-based special purpose limited liability company to develop and operate distributed-scale methane-to-liquefied natural gas (LNG) projects in Poland. LNG Silesia is a joint venture between Prometheus Energy Group, a U.S. based producer and distributor of LNG, and CETUS Energetyka Gazowa, Sp. z.o.o, a Poland-based company that provides operation and maintenance services to the Polish Oil and Gas Company, Poland's national natural gas company.

About Prometheus Energy

Prometheus Energy provides turnkey small-scale liquefied natural gas (LNG) solutions for energy consumers and energy producers. Prometheus helps energy consumers reduce fuel costs and environmental footprint by moving from high cost crude oil-based fuels to low cost, secure, domestic LNG. Prometheus helps energy producers to optimize E&P activities and establish new revenue streams by reducing waste and monetizing stranded gas resources. The company is vertically integrated across the value chain from LNG production through logistics, distribution, regasification and downstream marketing.
