

Prometheus Energy Receives START Award of Excellence for Occupational Safety & Health

START – (Safety Through Achieving Recognition Together) status helps establish a competitive advantage by being recognized as a safety-conscious company

Redmond, WA, July 17, 2012— Prometheus Energy Redmond office was recognized by the Washington State Department of Labor & Industries for its safety and health programs sustained through the combined efforts of the company's employees and management.

Presented by the Department of Labor & Industries at the Prometheus Energy office in Redmond, Washington, the award recognized Prometheus' demonstration to a commitment of

safety and honored the company with a certificate of START status, acknowledging the company's safety efforts, management commitment to safety for employees and customers, prevention of workplace injuries and illnesses, and cost savings from reduced workers' compensation and medical expenses among others.

A Washington statewide program, START status recognizes occupational safety and health excellence, leading to a safer workplace, improved morale, and community recognition. Prometheus Energy is only the fourth company in the state of Washington to be honored with the award. Achieving START status entails a comprehensive review of the company's safety and health programs by a Washington state L&I Consultant, including on-site evaluations, extensive application reviews, and full service consultation process.

The START Award was presented by Washington State Department of Labor & Industries' Statewide Consultation Manager, Lynda Stoneberg, and was accepted by Matt Barclay, Prometheus Energy's Director of LNG Supply, and Swati Shastri, HSSE Manager (Health, Safety, Security & Environment). "It is a privilege and honor to accept this award on behalf of Prometheus Energy. Our goal is to have a positive impact on our communities, employees and customer operations while keeping safety our number one priority," said Barclay.

“Prometheus Energy well deserves this honor as a START site having demonstrated their commitment to safety and health throughout their organization,” said Lynda Stoneberg.

About Prometheus Energy

Prometheus Energy is one of the largest and fastest growing suppliers of liquefied natural gas (LNG) to the industrial sector in North America. Prometheus provides turnkey fuel solutions to convert industrial users of diesel, propane and other crude-derived fuels to clean, domestic, secure LNG, resulting in reduced fuel cost and environmental footprint. The company is vertically integrated from LNG production through distribution, onsite storage, and vaporization. A pioneer in the industrial LNG market, Prometheus developed first-of-their-kind conversions of industrial fuel consumers to LNG in numerous sectors, and received an Award of Excellence at the 2011 Platt’s Energy Awards in recognition of its industry leadership. Prometheus Energy Group has more than 60 employees in offices in Houston, TX, Redmond, WA, and through its joint venture entity, LNG Silesia Sp.zo.o, Katowice, Poland. Prometheus Energy is privately held by Shell Technology Ventures Fund 1 B.V. and Black River Asset Management LLC, a wholly owned but independently managed subsidiary of Cargill.
