

Prometheus Energy Group Named Finalist in the Platts Global Energy Awards

Company Selected as Rising Star in Business Innovation and Operational Excellence

Redmond – September 28, 2011 – Prometheus Energy, the largest and fastest growing supplier of liquefied natural gas fuel solutions to the industrial sector, announced that it has been selected as a finalist in the Platts 2011 Global Energy Awards in the ‘Rising Star Company’ category. The Rising Star Award recognizes the achievements of emerging companies that are creating new opportunities in the energy industry.

Prometheus Energy was selected by the Platts Global Energy judging team based on demonstration of growth, market opportunity, quality of commercial innovation, operational excellence, and strategic vision.

“Our customers are enjoying reduced fuel costs and improved environmental footprints,” says Ron Bertasi, the company’s CEO. “Prometheus Energy provides turnkey solutions to convert industrial users of crude-derived fuels like diesel, propane and heating oil to clean, domestic LNG, and our technical and commercial innovation has created first-of-their-kind conversions of industrial customers in sectors as diverse as food manufacturing, oil & gas drilling, and commercial laundry”.

The Platts Global Energy Awards Finalists were selected from among hundreds of other energy companies nominated by businesses, investors, journalists, and industry insiders. The Platts judging team conducted a thorough selection process to form the 2011 finalist list.

A full list of all the Platts 2011 Energy Awards finalists can be found on the Platts Global Energy Awards website at <http://geaweb.platts.com/Home.aspx>

About Prometheus Energy

Prometheus Energy provides turnkey small-scale liquefied natural gas (LNG) solutions for energy consumers and energy producers. Prometheus helps energy consumers reduce fuel costs and environmental footprint by moving from high cost crude oil-based fuels to low cost, secure, domestic LNG. Prometheus helps energy producers to optimize E&P activities and establish new revenue streams by reducing waste and monetizing stranded gas resources. The company is vertically integrated across the value chain from LNG production through logistics, distribution, regasification and downstream marketing. For more information, please visit
